Forest of Derricks Springing Up in the Wainwright Fields

Real Activity is Being Shown as New Producing Wells are Brought In.

With the erection of a number of new derricks, within the last few weeks the appearance of the Wainwright oil area is fast changing. During the last week two new wells have been drilled in and many derricks have been completed and are awaiting the arrival of new drilling machinery and drilling crews. The Wainwright No. 4 on L. S. 9, of Section 36, Tp. 44.7 west of 4; immediately west of the town of Wainwright, has been drilled to one of the best appearing sands in the district. This well is being bailed and looks like a 100 barrel well. This is the fourth well this company has drilled on this Legal Sub-division. Number one well when completed to the first sand at 2072 feet had an initial flow of 300 barrels per day for some time till the well sanded up and it was decided to drill it to the next sand. This has just been drilled to 2225 feet where the pipe will be cemented and the well should be ready for drilling about the end of the month. Number two well was completed as one of the biggest gas wells in Central Alberta, and is being used to supply gas for the drilling of other wells being drilled near this location. Number three well has been drilled to 2052 feet and will be complete as soon as the tools have been released from No. 1 well. Immediately north of Wainwright No. 1 on L. S. 16, Mr. N. J. Maxwell, of the Admiral Oils has a new derrick completed and machinery and crew are on the way. Mr. Maxwell states that they expect to start drilling as soon as the machinery can be assembled. Immediately west of the Admiral location, the Wainwright-West headed by Toronto interests have a derrick up and all arrangements completed for drilling as soon as the machinery can be placed. About two miles northwest of the Wainwright group of wells, a Brandon Syndicate have commenced operations on L. S. 1-10-45-7-4. The derrick has been erected and practically all of the machinery has been installed. Cornering this location on L. S. 12 Section 2-45-7-4, the Hargel Oils Limited, who have taken over part of the B. P. holdings have derrick timbers and some equipment on the location. About one mile north of the Wainwright group on the northwest of Section 2-45-6-4. The Lloyd Petroleum Limited have erected a new derrick and expect to commence the drilling of the first ten wells in the very near future. Immediately north of this location the Beth-Wain Co., have secured a location and expect to have drilling under way within a couple of weeks. Both of the latter locations are on leases held by the Interior Oils Ltd. At the British Wainwright location, immediately south of the B. P. and Edmonton Wainwright Oils producers, the drillers have just completed drilling out the cement plug and think they have a well that will produce 100 barrels per day of crude oil. This will make the fourth producing well within a short distance of the Associated Refineries Limited which is on the L. S. North of this well. This refinery is now receiving 55 barrels per day from the Sasko-Wainwright well which was only recently completed, 35 barrels per day from B. P. No. 3B and 20 barrels per day from Edmonton-Wainwright well. The Associate Refineries have a ready market for all of the products they produce from this oil and are planning on adding more equipment as fast as necessary to handle future production. In close proximity to this group of producing wells several companies have started drilling or are arranging to make an early start. Among these are the Wainwright Petroleum, who have their derrick and tools on L. S. 6 Section 30-45-6-4, Emerald Oils Limited, Sasko-Wainwright Oils, Hargel Oils Limited, the Onalta Company who have started operations on Western Consolidated well. East of Wainwright the London Ribstone Petroleum Co., are coring their third structure test. After this has been completed, a location will be made for their No. 2 well. In the Fabyan area the Fabyan Petroleum Co., have been experiencing considerable difficulty in removing the liner from No. 1 well. We understand that most of this has been removed and actual drilling should be resumed at an early date. The Maple Leaf Co., have their derrick up for their second well and several other locations have been made in this area. North west of Irma, eastern interests have made two locations, one on Section 12 and one on Section 29 both in Township 48-10-4. Several of the wells being started are being equipped with machinery capable of making deep test and before the summer is over several of the lower sands will likely have been penetrated and the real value of some of the sands will have been proven. Great interest is being shown in leases and many of the leases that have been cancelled during the last two years are being disposed of by the Department of the Interior at good bonuses.

PIPE CONTRACT LET FOR MAINS

(From Viking News)
Contracts for the laying of the first section of a duplicate pipe line between the Viking gas field and the city of Edmonton, amounting to approximately \$317,000 has been let by the Northwestern Utilities Ltd., to the firm of W. A. Forman Ltd., and Louis Jackson, the distance to be piped this year being 20 and two-thirds miles and work will be started from the field. It is understood that work on this pipe-line will start about the middle of July.

The contract calls for the spending of \$317,000 in material and approximately \$50,000 in labor, and in all cases it is understood that the prevailing rate of labor in force in Edmonton will be maintained by the contractors.

109,120 Feet
In all 109,120 lineal feet of pipe will be put in, and 70 men will be kept on the job, which will be rushed through as quickly as possible, a 24 hour day a day shift being maintained. Delivery of the pipe will start from the factory on June 22 and will be shipped daily at the rate of one and a half miles per day from that date. The pipe is 12 3/4 inches outside diameter and will be specially treated with a bituminous coating before being placed in the ground.

On certain sections of the line where the land has corrosive qualities a special treatment will be placed on the pipes which will give them a resistance that will prolong the life of the line indefinitely. Approximately seven miles of the line will be treated with the special preparation.

The pipe that is being used in this line weighs 37.811 lbs. to the foot, and has an average thickness of .284 inches and has been tested to take a pressure of 700 lbs.

WHEAT POOL NOTES FOR THIS WEEK

The Alberta Wheat Pool has fixed July 15th as the closing date for the 1928-1929 Pool. There are quite a number of Pool farmers who have still a little wheat on hand and they are advised this wheat must be delivered by July 15th, otherwise it will go in with next year's pool.

The Supreme Court of Canada has decided in favor of the Alberta Wheat Pool contention in the H. W. Kay suit. The Supreme Court judgment sustained the judgment of the Supreme Court of Alberta which was that the matter in dispute was one for arbitration and not for legal action.

According to reports from Ottawa the Federal Government is bringing in into effect legislation which will greatly reduce mixing of wheat in terminal elevators. The Wheat Pools have strongly urged that the government should take steps to limit the mixing evil.

The Canadian Journal of Commerce in a recent issue states: "Despite the large crop of last autumn Wheat Pool members have excellent reasons to be thankful that their crop was not subjected to the vagaries of the members of the Chicago and Winnipeg Grain Exchange whose primary object is quite naturally, and under former conditions quite properly, to buy and sell at a profit to themselves."

Wedding Bells

On Monday afternoon at 4 o'clock June 12th, at the Manse of Central United Church in Edmonton, Marian Alberta Walker, youngest daughter of Mr. and Mrs. Wm. E. Walker, formerly of Irma, was united in marriage to Kenneth Leslie Grant Allan, eldest son of Mr. and Mrs. Andrew Allan, all of Edmonton, by the Rev. Russell McGillivray.

The bride wore beigeorgette and lace, and carried white carnations and was attended by her sister Anna. The bride was given in marriage by her mother. The groom was supported by Ashley Walker. The wedding was very quietly solemnized, only relatives being present. The happy young couple will reside at 9322 Rowland Road, Edmonton.

M. D. Battle River Councillors Transact Variety of Business

Council of Municipal District No. 423 met in the Council chamber with all members present. Minutes of May 10th were read and on motion of Mr. Burton were accepted as read.

Moved by Mr. Burton that report on Glen Road be accepted. Carried.

Moved by Mr. Smallwood that Messrs. Fischer, Burton and Burrell be appointed as a committee to investigate road diversion on the S.W. 18-44-S-4th and report at next meeting. Cd.

Moved by Mr. Burton that Messrs. Smallwood and Fischer act as weed committee under the noxious weed Act 1929. Cd.

Moved by Mr. Vesey that the application for grant for the Salvation Army be tabled until all grants are considered. Cd.

Moved by Mr. Fischer that the Reeve be placed on the roads committee. Cd.

Moved by Mr. Vesey that committee investigating proposed roadway thru Sec. 3-45-8-4th have power to act. Cd.

Moved by Mr. Burton that this council does not approve of a caveat being registered against the N. half of Sec. 17-44-S-4th and the Secretary be instructed to inform Mr. Purvis to have same caveat removed. Cd.

Moved by Mr. Burrell that the secretary and reeve sign all tracings of plans as per Mr. Coutley's letter and return same direct to the Director of Surveys for his approval and registration. Cd.

Moved by Mr. Vesey that the cemetery committee have power to draw up specifications to gravel and give contract for roadway in the Cemetery. Cd.

Valuators report on the North Half and S. W. quarter of 20-44-9 with read. Moved by Mr. Burrell that same be accepted as read. Cd.

Moved by Mr. Fischer, Whereas the Municipal District of Battle River No. 423 under the Tax Recovery Act 1929 has for sale the North half and S. W. quarter of 20-44-9 with therefore be it resolved that the date of the sale be Tuesday, the 13th day of August, 1929 at 2 p.m. The sale price of these three parcels of land shall be the sum of \$985.00 or permission to sell separately as follows: The N. E. quarter 20-44-9-4th for \$320.00; the N. W. quarter of 20-44-9-4th for \$300.45; and the S. W. quarter of 20-44-9-4th for \$364.55; that Mr. Smallwood the Reeve act as Auctioneer. Terms of the sale shall be 20 per cent. cash and the balance to be paid in three equal annual instalments, bearing the rate of 8 per cent. interest per annum. Cd.

Moved by Mr. Smallwood that By-law No. 26 for the purpose to provide for the imposition of a Business Tax pass its first reading. Cd.

Moved by Mr. Fischer that By-law No. 26 pass its second reading. Cd.

Moved by Mr. Burton that By-law No. 26 pass its third reading. Cd.

Moved by Mr. Santee that By-law No. 26 be forwarded to the Minister of Municipal Affairs for his approval. Cd.

Moved by Mr. Burton that the petition against a herd by-law in Division 5 be accepted. Cd.

Moved by Mr. Burton that By-law No. 27 for the purpose of Restraining animals at large in Division 5 (Municipalities) 1923 be forwarded to the Minister of Municipal Affairs for his approval. Cd.

Moved by Mr. Fischer that persons dumping stones, roots, rubbish, etc., on any road allowance in this Municipality will be prosecuted. Cd.

Moved by Mr. Burton that the Secretary purchase a Noxious Weed Report book of Forms for the use of the Weed Inspector. Cd.

Moved by Mr. Smallwood that H. Kasten be appointed Road Foreman for Div. 3. Cd.

Moved by Mr. Smallwood that a speed limit of 10 miles per hour be put on both sides of the Hill through Sections 15 and 16-45-S-4th and that a danger sign be placed on top of both sides of this hill, as follows, "Danger Go Slow do not exceed 10 miles per hour." Cd.

Moved by Mr. Burton that the following time sheets be passed.

Geo. Rubenack	257.00
P. J. Harvey	\$400.54
P. J. Harvey	\$413.40
W. Myers	\$570.02

CHURCH NOTICES AND ACTIVITIES

IRMA UNITED CHURCH NEWS
11 A.M. — Irma Church School. The adult class has the basement to discuss the lesson in.

11 A.M. — Strawberry Plains. This will be the farewell sermon as Rev. Mr. Wright leaves Irma July 1st.

3 P.M. — Alma Mater.
8 P.M. — Irma.

"My Successor" was the pastor's theme last Sunday and his text "I must decrease, He must increase."

The Church Redecorated
Mr. Carter has completed his work on the interior of the church and it does him credit. Beautifully bright cherry walls and ceiling greet you and woodwork, stove and pipes shining, make harmony everywhere. Attend church to worship God and thus keep in tune with the Infinite and His world, and the people of His creation.

FOR MY CHURCH
The Church does a great deal for boys and girls. It provides a place where they may have christian teaching and a place for them to meet with others to worship God. It helps them in every way to learn how to make life count. It keeps pointing out the road to happiness and it warns against the things that bring unhappiness.

What are some things we can do to stand true to the Church? We can become loyal members. We can attend its services regularly and give from our earnings to the support of its work. We can make it a rule not to plan any social times that will conflict with the Church's program, or that will keep ourselves or others away from its services. We can make the Church popular with other boys and girls by the way we show our pride in it and our loyalty to it.

The Pastor has about \$50.00 worth of books loaned through the country and would like to have them now as he is packing his books. Kindly look through your book shelves and return same.

ANGELICAN CHURCH.
There will be a service on Sunday next in the Masonic Hall at 11 A.M. The Holy Communion will be celebrated at this service.

N. B. A Sunday School will be held immediately after the service.

A. M. Trendell, Vicar Wainwright. A choir practice will be held on Saturday next June 22nd, at the home of Mrs. Joyce Jones at 8 P. M.

The Charter of Anglo-Saxon Liberties

When King John, of England, placed his seal upon that historic document Magna Charta, on June 15, 1215, the date went into history as that of the "greatest of all events in the political development of modern freedom."

Nearly 700 years after the signing of the Great Charter of Liberty, a movement which had its inception in the United States, gave birth to the International Magna Charta Day Association, with headquarters at St. Paul, Minn. The main objective of this organization is to have June 15 of each year observed as "Magna Charta Day," or "Inter-Dependence Day," in all the English-speaking nations of the world.

Observance of the day and of the charter which is the common heritage of these English-speaking nations is urged by the Association as an expression of the recognition of the common tie that binds these nations and the common debt they owe to those responsible for the Great Charter which is the foundation of modern ideals of liberty. The Association urges observance of the day also as a means of cementing the friendship and promoting mutual understanding between these nations which, speaking the same language, and having the same ideals, are acknowledged to be the greatest forces extant for permanent world peace. Magna Charta provides that basis of unity which these nations can commemorate. Its signing was an epoch-making incident in their common history concerning which no clash of opinion is possible. One American commentator says: "The yearly observance of Magna Charta Day not only helps to keep vibrant this Anglo-Saxon International Good Will but it serves to set out in sharp relief a wholesome example to the wide world."

The alternative title, "Inter-Dependence Day" itself is an acknowledgment that American ideals of freedom have the same fundamental basis as those of the British Nations, including Canada, and it is interesting to note that since the Association first was organized, the Day is observed annually in the United States, Canada, Newfoundland, the British Isles, Australia, New Zealand and South Africa. That is, the nations which trace their laws back to the historic document forced upon King John by the Barons of England, join in remembrance of the freedom it has conferred upon all. Says J. W. Hamilton, Founder-Secretary of the Association: "More and more, it has become the Inter-Dependence Day of the English-speaking countries as men have come to understand the inter-ethnic kinship its recognition indicates."

"The thought is American-born, a gesture of deference to the acknowledged fount of freedom, and a tender of goodwill to other English-speaking lands of the earth."

The Day is not observed as a legal holiday, but as one of remembrance. Teachers in the public schools, wherever the Day is observed, emphasize the significance of Magna Charta to their pupils, and explain its significance in the lives of all residents of English-speaking countries. In many places, too, it is supplemented by setting aside the nearest Sunday to June 15, as "Magna Charta Sunday" on which, by pulpit reference or Sunday School lesson the goodwill which is the central feature of the observance of the Day is given prominence. It might as well be the basis of a valuable lesson in British ideals for the cosmopolitan people of Canada—and for that reason it is interesting to note that Canada as a nation has endorsed the idea of Magna Charta Day.

Briefly stated, Magna Charta established trial by jury, restrained the Crown from using harsh and arbitrary methods of raising money, virtually placed control of taxation in the hands of the people, gave protection to minors and widows, established uniform weights and measures, limited fines and protected merchants, established the law of evidence, and, generally, assured the rights and freedom of the subject. These are the most important features of that charter which occupies so conspicuous a place in history and which established the supremacy of the law of England as the controlling power over the people.

The 39th article of the charter which is the basis of jury trial, declares "no man shall be taken, or imprisoned, or outlawed, or banished except by the lawful judgment of his peers." Another short article is significant of the desire for justice for all. In it, the King declared: "To no one will we sell, to no one will we refuse or delay, right or justice."

Marble From the North

Northern Manitoba Stone To Be Used On Office Building In Montreal

Native marble, quarried in Northern Manitoba, along the Hudson Bay Railway, may soon replace marble from Italy. "Manville," as the Canadian product is called, is being used extensively in the construction of the new head office building of the Sun Life Assurance Company, Montreal. Shipments were recently sent from The Pas by the Canadian National Railways. The northern marble is of fine texture, hard but not unduly so, and can take a beautiful polish and a sharp arris.

Excuse Still Good

Office boy—"I'd like a holiday this afternoon, sir. My grandmother is dead, sir."

Boss—"But didn't I give you an afternoon off a month ago because your grandmother was dead?"

Office Boy—"Yes, sir, she is still dead, sir."

When Holloway's Corn Remover is applied to a corn it kills the roots and the callous comes out without injury to the flesh.

Forest Products Rank High
Forest products in Canada rank second to those of agriculture with an annual value of approximately \$500,000,000.

FLU Germs Breed In the Throat.

First: Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. "Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville's. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combined treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Telephones In Canada

Domestic Is Served By 2,462 Separate Systems

There are 2,462 telephone systems in Canada. Five of these are government owned, Alberta having two, Ontario, Manitoba and Saskatchewan one each. Municipal systems number 158, of which 123 are in Ontario. There are 496 private company systems, mainly in Ontario and Quebec, and 1,552 co-operative, of which 1,150 are in Saskatchewan. In addition, there are 169 private and 102 partnership systems. The number of telephones installed totalled 1,250,957, when a recent compilation was made, the estimated number of conversations made in one year totalled 2,108,100,000, including 31,000,000 long distance calls.

ST. VITUS DANCE

A Disease Of The Nerves Which Must Be Treated Through The Blood

St. Vitus dance is a disease of the nerves brought on by a morbid condition of the blood. It is a common disease with children, but sometimes attacks adults. The treatment of this trouble to be successful is through the blood, because rich, red blood is the life food of the nerves. In this way Dr. Williams' Pink Pills have proved beneficial in even the most severe forms of this trouble, because they enrich the blood supply, thus carrying the necessary food to the nerves. In proof of the value of Dr. Williams' Pink Pills, we have this case: "I was suffering from an attack of whooping cough which left her very weak, and finally developed into a severe attack of St. Vitus dance. She was under a doctor's care, but with no beneficial results. We also tried other treatment, but with no better results. To make matters worse, she was taken down with measles. After the doctor was called in, as she became so weak, and her limbs so tremble that we had to take her about in a little hand wagon. I thought a change of air and scene might help her, so we sent her by boat to Port McNicoll, a distance of about a hundred miles. She seemed to improve while there, but as soon as she came home her strength was gone again. I took her to another doctor, but with no better results. I was distressed to see how helpless she was becoming, so decided to give Dr. Williams' Pink Pills a trial. I got six boxes, and they did what neither doctors nor other remedies had even started to do. The but her lip completely, the St. Vitus dance disappeared, she has no sign of weakness and can run and play with the other girls. A thing she could not even try to do for about eighteen months. She walks to and from school, a distance of about eight miles, and is proud of her present good health. I have much to praise Dr. Williams' Pink Pills for, and always recommend them in all cases of weakness. You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Motion Pictures Of Northern Scenes

Arriving at The Pas, Captain Charles Sutton, pilot and party have completed an 8,000-mile aerial voyage which took them into the northern wilds, far beyond Fort Churchill. Motion pictures of the northern scenes and of the inhabitants, the Eskimos, were taken. This was the main objective of the journey.

Attacked By Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Probe For Canada. The Chicago Tribune says: "Canada is a land of agriculture and minerals and of fish and forests. When crops in the west no longer have the heavy surpluses of the present, Canada will expand again. It is a great potentiality, and as long as rains fall and the black earth of the glaciers and the black earth of the glaciers land where men will wish to live."

Wheat Acreage

It is estimated that nearly 25,000,000 acres will be sown to wheat in Canada this year. Last year we had 24,114,846 acres sown to wheat, and the total production was 533,571,000 bushels, an average of 22.1 bushels per acre.

Columbia Ice Fields

The melting waters from the Columbia ice-fields in Jasper National Park feed the sources of three of the largest, and most historic rivers in the Canadian West—the Athabasca, the Saskatchewan, and the Columbia, which flow into three oceans.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Settlers For Alberta

Quite a few new settlers from the United States have arrived in the Tully, Alta., district during the past two weeks and several families have also come into the Brooks area to take up farms in the Rainier district. The details in all cases are being arranged through the Canadian Pacific's Department of Natural Resources.

Use Minard's for the rub down.

One advantage of the fliver over the airplane is that when the fliver's engine stops, so does the fliver.

Good Friend To Trappers

Radio Makes Life In Northern Wilds Less Lonely

The trapper's life in the wilds of northern and central British Columbia is not the lonely existence it used to be, for the radio in keeping the isolated cabin homes of these forest nomads closely in touch with the world's activities.

The radio has been a wonderful boon to the Canadian trapper and only the lowliest of them have not equipped themselves with radio sets. Indeed, owing to the distance to be covered and the various technical difficulties to be overcome to obtain satisfactory reception, most of them have bought powerful sets. No longer does the trapper find that nights are made for sleep alone. After following the trapline all day the modern trapper spends the evenings in his cabin smoking his pipe and listening to the news of the day and the orchestra broadcasts from hundreds of miles away.

Uniform Prize Ribbons

Uniformity In Color Is Agreed Upon For Fairs and Exhibitions

The Canadian National Exhibition, Toronto, has informed the Canadian Association of Exhibitions that it is willing to co-operate with the association's suggestions for uniformity of color in prize ribbon awards throughout Canada.

Hereafter at all fairs and exhibitions under the jurisdiction of the association first prize will be denoted by red, second by blue, third by white, fourth by yellow, fifth by green, and sixth by pink. Sweepstakes winners will be awarded the red, white and blue combination and the grand champions red and blue.

Much confusion has resulted in past years at fairs and exhibitions by the failure to adopt a standard system of colors with regard to awards.

Sore Corns Drop Off

If you USE "Putnam's"

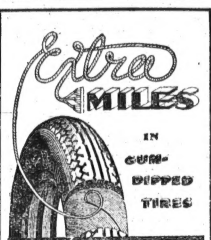

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

Faith and Works Inseparable

"Twas an unhappy division that has been made between faith and works. Though in my intellect I may divide them, just as in the candle I know there is both light and heat, but yet put out the candle, and they are both gone; one remains not without the other. So 'tis betwixt faith and works."

Waterton Lakes Famous For Trout

Excellent fishing may be enjoyed in the National Parks of Canada, especially in the Waterton Lakes Park, Alberta, which is famous for its trout. Specimens of trout weighing as much as fifty pounds have been taken from Waterton Lakes.

GUM-DIPPING which saturates every fibre and every strand of every cord with pure rubber, serves the same purpose as that of a cobbler waxing his thread . . . prevents friction and multiplies strength.

This extra strength multiplies mileage, and increased mileage with no increase in price means lower cost per mile. That's why Firestone Tires give

Peace River Crops

Crop conditions throughout the Peace River country are very promising at the present time and the season is somewhat more advanced than in more southerly sections of the province, according to authoritative reports. The movement of people into the Peace River country during the past year or two is being reflected in a considerable increase in the acreage under crop in 1929 as compared with last year.

Irrigation Cost Runs Into Millions

Construction cost of 10 major irrigation projects now operating in Southern Alberta amount to about \$31,800,000, or an average cost of approximately \$31 per acre for the area or slightly more than one million acres.

Tennis and Golf

Players everywhere use Minard's to ease sore and tired feet.

Right Class Of Immigrants Cannot Fail To Make Good In This Land of Opportunity

The shiploads of immigrants who are now arriving at our Atlantic ports and making their way to various parts of the country, will, we have no doubt, with few exceptions, turn out to be self-reliant people prepared to make the struggle that average human beings have to make in order to get along. It is to be presumed that they have all heard about Canada as a land of opportunity, and they cannot misunderstand this to mean opportunity for living in idleness. Such of them as intend to stay, and not merely to linger a while as birds of passage on their way to the United States, must intend to do their part as producers of wealth. From time to time there may be need to help individual families to get on a footing of self-maintenance. Neighborly kindness from people already settled and thriving here is to be taken for granted. It is worth far more than any excessive paternalism on the part of the state.

Some organization in this country and some persons who set themselves up as class spokesmen might a great show of uneasiness about the increasing of the country's population by immigration. Labor leaders fear that we shall have more town dwellers than we can find work for. Agitators in the agricultural regions profess to be alarmed over the increase of tillers of the soil, who would add to the output of farm products and bring the price of these products down. These woful ones worry more than the willing and enterprising workers who drive up immigrants. If the newcomers are industrious and add to the country's total output, they also add to the country's total consumption. Efficient producers are efficient consumers. If they increase the produce that is to be marketed they also increase the capacity of the home market. Worthy immigrants cannot be long in this country without very greatly increasing their buying power. They will live better than they lived over-sea because they can afford to do so. A hundred thousand new-comes of the right stamp will in a few years be worth far more to Canada as consumers of her products than they were as importers of Canadian products in the countries whence they came.

Canada has no fault to find with her own people. She cannot have too many of the same kind. We hope the native-born Canadians will go on increasing in number. Men and women of the stock that settles this country are needed to recruit its population and become the fathers and mothers of native-born Canadians. Then let us welcome with open arms all of the right kind who come from the British Isles and from the preferred countries of the continent of Europe. The coming of such people will assist in giving a further impulse to the progress of this country. — Toronto Mail and Empire.

British Capital Wanted

Canada welcomes American capital, or any other capital, observes the Ottawa Journal, and will always treat it fairly; but next to control of Canadian enterprises by Canadians the best thing that can happen is to keep control of what we have within the British family. That is one kind of Empire preference about which there should be unanimity.

Source Of Gold

The chief source of the gold produced in Canada is the gold-bearing quartz deposits of the Porcupine and Kirkland Lake districts in Ontario, which are responsible for more than 85 per cent of the output.

"The witch pretends not to know me, and yet he has to thank me for his divorce." — Brummel, Berlin.

W. N. U. 1788

The Call Of The Land

Cyrus G. Shaver Returning To Manitoba To Farm Again

"The call of home" is strong. In the case of Cyrus G. Shaver, the call of the soil was too strong for him to resist.

Mr. Shaver was born and raised on a farm in the Pembina Valley, in southern Manitoba, and in 1922 he left Canada and secured employment in Detroit.

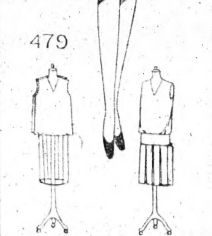

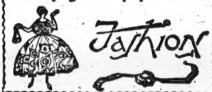

In Detroit he did well and bought a home and settled down.

The call of the soil of the home-land was too strong and he recently appeared in the Land Settlement offices of the Canadian National Railways at Winnipeg.

Two days later he had secured a farm, 320 acres in extent, near the town of Dugald, two stations east of Winnipeg.

He has made arrangements to bring his family back to Canada with him to take up life in the province he knows intimately. The farm is provided with first class buildings and much of the land is now under cultivation.

Winnipeg Newspaper Union

PRACTICALITY AND CHIC

A printed silk crepe whose wearability makes it an economical choice for Spring wardrobe. Its lines are slender and straight; so becoming with lightweight woolen or silk crepe top coat. The neckline is smart and comfortable for all-around wear, with rever collar and scurge tie of plain harmonizing silk crepe. The box-plaits across front of skirt are youthful fashion. Style No. 479 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust, and is made with 3 yards of 40-inch material with 3/4 yard of 56-inch contrasting in the 36-inch size. It is an excellent model for tennis made with short sleeves, or sleeveless of printed plique, striped washable rayon silk, flat silk crepe or linen. Printed cotton foulard, georgette crepe, and featherweight woolen fabrics are also suitable. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

Making History

Greater Progression Shown Now Than In Any Previous Era

It seems a mere platitude to say that we live in times that will make history. The same could be said, and has been said, of all times since Man first began to think about the effects of his own days and his own achievements upon posterity. The world is busy today, as perhaps never before, preparing entirely new and improved conditions for the generations of tomorrow and the day after tomorrow. True, mankind was doing exactly the same thing during the past century and in the century before that, but this does not alter the fact that the present is a time of far greater activity than has ever been the case in the past. In all branches of human activity, applied science has revolutionized man's relations with his fellowmen, standards of living, of working, of thinking, are being raised at a bewildering speed and will yet change more completely still. And in this vast metamorphosis the most progressive as well as the most far-seeing portion of the human family is that which constitutes the British Empire. — Malta Daily Chronicle.

Very Young At Forty

Italy Thinks Man Just Starting At That Age

France Gatta, young Italian electrical engineer, who was at the Hotel Pennsylvania, New York, from Milan, says the young man in America has more opportunity than the young man of Italy.

"We never have any thirty-year-old men teaching in our universities," he said. "A man is thought to be very young at forty, and is just getting his start. It takes us longer to finish our education and we are not given important positions until we have worked for many years with a firm."

A Submerged City

Photographers are making pictures of the submerged city of Jamestown, once the capital of New-Island in the West Indies. The remains of the city may be seen near the shore, beneath the level of the sea. Jamestown, on April 30th, 1680, was visited by an earthquake, and the town slipped into the sea, carrying with it all its riches and a population of 44,000.

Preachers and Listeners

Sometimes we hear the complaint that good preachers are scarce, and we believe it. More than that, we have the conviction that they always were scarce, and always will be. And it is just possible that the good listener is even scarcer than the good preacher. — New Outlook.

Buying More Wheat Flour

Increase In Sales From Canada To Northern Europe

Canada is increasing sales of wheat flour in Northern Europe, despite tariff barriers in many cases. This statement is contained in a report to the department of trade and commerce by M. B. Palmer, acting trade commissioner to Hamburg. Sales to Germany, Austria and the Baltic States, Scandinavia and other countries in the area amounted to 2,621,012 barrels of flour valued at \$15,883,397 in 1928 as compared with 2,132,980 barrels valued at \$13,972,653 in 1927. Germany imported 14,918,625 bushels of wheat from Canada in 1928; 2,108,399 bushels of rye, 4,788,925 bushels of barley, and 946,236 bushels of oats. These totals nearly \$27,000,000 or 57 1/2 per cent of the total value of Canadian exports to that country.

Czechoslovakia, Denmark and Scandinavia are also heavy buyers of Canadian grains. Germany buys large quantities of packing house products from Canada, notably sausage casings to the amount of 1,376,760 pounds valued at \$298,601 in 1928. Other commodities of great importance in Canada's exports to Germany include dairy products, honey, canned goods, fresh and dried fruits, fish and fish meal, seeds, crude drugs, whiskey and faxes.

Canadian B.C. B.C. Bird Sanctuary

Number Has Increased Rapidly In Last Six Years

Very rapid increase has taken place in the number of Canada geese in the Vaseaux Lake Bird Sanctuary, British Columbia, since this area was set aside for this purpose in 1923. In one part of the reserve, an island in the lake where only three geese nested in 1919, thirty-five nests were counted in 1928. Throughout the whole sanctuary the number of nests counted in the latter year was fifty-five, whereas in 1923 the number of incubating birds was very small indeed. During last summer over four hundred geese were counted at one time.

The Tables Are Turned

There are no more people migrating from the United States to Canada than there are Canadians migrating south of the line. Year ending March 31st, 1929, Canada received a total of 64,853 of which 33,793 were returning Canadians. The number of Canadian leaving for the U.S.A. has been declining in the last 3 or 4 years.

Miss Pasmarte: I hear you have a model house. Is he a late model? Mrs. Junehurst: The very latest. From 12 to 2 a.m. every night.

A TEASER

No. 9, Cleopatra—215 yards, Par 3.

The ninth hole of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the amateur championship of the Royal Canadian Golf Association will be played August 19-24 this summer, is one of the trickiest in Canada. The championship tee (No. 1) is considerably elevated and the green, which is very fast, is also built up high. The trick, therefore, is to play a tee shot which will hold the green. Yawning traps surround the green to eat up the strokes of the golfer who fails to play this hole properly. Like its famous namesake, "Cleopatra" is likely to wreck a lot of reputations at Jasper in August.

Co-incidental with the Canadian Amateur, the Western Canada Amateur will be played over the Jasper Park Lodge Course, and this will provide plenty of competition for those whose high handicaps automatically keep them out of the Dominion event.

The upper photograph was made from No. 1 tee. Below it is a plan to scale showing the hole in detail with the three traps plainly indicated. The figures below represent the yardages.

The Interesting Story Of A Remarkable Achievement In Canadian Railway Construction

Canada's High Grade Seeds

Excellent Quality Is Commanding Recognition On Foreign Markets

The production of high-grade seeds in Canada is steadily increasing in importance. Canadian-grown seeds command recognition on foreign markets by virtue of their inherent qualities of winter hardiness and vigour of growth, and because the standards of quality for graded seeds of all kinds are so highly regarded. Stocks of high-grade seed of wheat, oats, barley, alsike clover, sweet clover, bromes, Canadian blue, and brown-top are usually available for export. Average imports of timothy seed are about 5,000,000 pounds annually, but with further encouragement Canadian production will soon be equal to our requirements. Alfalfa seed shows a decrease in production, due to adverse climatic conditions. Red clover seed production in Quebec, Ontario and British Columbia is increasing from year to year, due to encouragement given by the Dominion and Provincial Departments of Agriculture, and the demand for hardy, home-grown seed. Alsike seed production in the older districts of Ontario is keeping up in quantity, but not in quality. The newer districts of Ontario and Quebec are producing small supplies of cleaner seed. Tests are being conducted in Northern Manitoba and Saskatchewan to determine if alsike seed can be produced profitably in large areas now free of troublesome weeds. Wild white clover seed obtained from England has been distributed throughout Canada for tests in connection with seed production and permanent pasture purposes. Results so far indicate that it is a valuable permanent pasture crop in the central provinces. Brown-top or Rhode Island bent grass seed is produced in Prince Edward Island and Nova Scotia, and creeping red fescue and velvet bent grass in Alberta. Field root and garden vegetable seed production is making progress in British Columbia.

Snow Survey In Foothills

Valuable Information Is Secured In Regard To Water Supply For Southern Alberta

For the last six years, the Dominion Water Power and Reclamation Service, Department of the Interior, in co-operation with the United States Geological Survey, has annually conducted a survey of the snow conditions on the headwaters of the St. Mary River in Montana. The discharge from St. Mary River is of vital interest to the large irrigation projects in Montana and southern Alberta and to operate the irrigation facilities of these projects at the highest degree of efficiency, some advance information as to the available water supply is essential. While this survey may still be regarded as in the experimental stage due to the limited number of years of existence, some remarkable results have already been obtained. It is now established that a direct relationship exists between the depth of snow found early in May and the total runoff from the area during the following three months.

A Woman Brickmaker

The only woman in England who carries on the ancient craft of hand brickmaking is Mrs. Bennie Gibbs, of Crossways Farm, Ingham. Her father died a year or two ago, leaving an old brickyard in a corner of his farm. Mrs. Gibbs turned her attention to brickmaking, and became an expert. She motored with samples of her work to local builders and architects, who welcomed her fine hand-made bricks.

One Grand Refrain

Bachelor Friend: And is married life the grand, sweet song you expected it to be? New Benedict: Well, it's a grand, sweet refrain at least.

Bachelor: Refrain? New Benedict: Yes, my wife wants me to refrain from smoking, refrain from card playing, refrain from staying out late at night, and refraining from nearly everything else I used to get a kick out of.

Radio Commission Report

The report of the Dominion Radio Commission, which is anxiously awaited, will be complete by the end of August, it is expected by Sir John Aird, chairman of the commission, who has returned to Toronto from a five-weeks' tour of western Canada.

Hudson Bay is now on the railway map of the Dominion. This is the arresting opening of an article in the May issue of "Natural Resources, Canada," the monthly review of current events published by the Dominion Department of the Interior. The arrival of steel at Churchill, the Bay terminal, on March 26, last, had of course been duly chronicled, but required more than brief news mention to enable Canadians generally to realize just what the announcement signified and what rendered the event important and memorable. For "Natural Resources" declares that by linking that historic body of water with the outer world of steel, yet another epic has been added to the glorious saga of Canadian achievement. The speedy laying of the track, according to this authority, constitutes in truth the accomplishment of what many people had deemed to be impossible. Certainly, it proceeds, no other main line is exactly like the Hudson Bay Railway, stretching northward across Manitoba from The Pas to Churchill, and no other railway has been built under similar weather conditions.

Not only was the undertaking on the one hand a never-ceasing fight against the elements and the physical obstructions of a treacherous terrain, but on the other, a grim race against time, calling for bold and urgent expedients on the part of the engineers. Had the last rail not been in place before the frost broke, the consequent delay would have proved very serious. Steel, however, reached the terminus on March 29, permitting more than 300 carloads of material to be taken in and made available for the development of the port. This prevented loss of valuable time, unavoidable otherwise because of the interruption due to the spring break-up. Apart, too, from the personal hardships endured on the workers, the undertaking had more than its normal share of seeming insuperable obstacles. Much of the land was muskeg, and right here the talent of the Canadian engineer came in, for he utilized the aid of the frost in carrying his work forward without delay over time-consuming obstructions. When cold weather came, grading work was abandoned until the spring and the tracks were laid on ties on the frozen ground, as in the building of the Pile-Floor railway.

With the advent of spring, the grading gangs took up their interrupted work of ballasting the temporary track, one gang working up from the south, while at the same time another party began working its way southward from Churchill. Somewhere along the track the parties will meet, most likely early next August, when the golden spike will be driven by Right Honourable George P. Graham, who as Minister of Railways and Canada, turned at The Pas, Manitoba, the first end in the construction of the railway. Thus the finishing touch will be put on an undertaking in railway engineering that has won the admiration of the world. Owing, however, to the large amount of work to be done on the port facilities, engineers expect that the first shipments of grain will not be made until the season of 1930. The work at Churchill will proceed on carefully planned lines so that there will be no demand for loads which has not been foreseen and provided for.

Why Latitude Varies

According to a new theory of Dr. Harlan T. Stetson of Harvard, the moon not only causes tides in water but on the crust itself of the earth. This is tendered as an explanation of the variations in latitude when it is measured from the Equator.

Roman Matron: "Cornelia, run over to Horatius and tell him I'd love to have him make a fourth at bridge."

Lady (used to bargaining): "How much is the fare to Slonston?" Clerk: "Seven and sixpence return." Lady: "Make it seven shillings and I will go." — Soudanensis-Str., Stockholm.

Flying Fingers and Flying Heels

Helen McGregor, of Winnipeg, "The Flying Pianist" whose "flying fingers" earned her unofficial title, and Myrtle Cook, whose flying heels won her the official title of Amateur Lady Champion of the World at the Olympic Meet last year, take a lesson in navigation from Captain Dorr of the Canadian Pacific liner "Montrose."

Miss Cook, who now covers women's sports for the Montreal Star is not unfamiliar with the air, having flown the English Channel on several occasions when on the other side at athletic events. Miss McGregor is one of the few women familiar with the controls of trimotored planes. She travelled west as a passenger in the Junkers plane which was landed at Montreal from the Canadian Pacific freighter "Beaverbrook" for the Western Canada Airways, Limited, by whom it is used in air mail and express services.

BOUT CALLED OFF AGAIN

(From the Viking News)

The big boxing programme that was at first advertised for June 7th, then June 21st, has again had to be postponed. Curly Kid, the Irma scrapper, phoned the local Elks committee on Monday that he was unable to appear on account of his injured hand, which has not healed up since his scrap at Loughheed May 31st.

The committee regrets having to postpone the boxing programme once more as arrangements were all made for a first class program.

The bout has been postponed indefinitely.

Posters are now out announcing the mammoth sports day celebration to be held at Viking on Monday, July 1.

The committees are busy arranging the various events and in our next week's issue we hope to publish a complete list of the things that you will see.

In the meantime spread the good news to all friends and acquaintances. Make up your party and come and spend the day in Viking.

The members of the Juvenile band met in the town hall on Monday evening and were allotted their instruments. The band starts out with a membership of 39 under the leadership of Basil Hilliker. Parents who have youngsters in the band will get an "earful" of music from now on.

A large crowd gathered at the home of Mr. and Mrs. L. Wollen on Sunday June 9th in honor of Mrs. H. P. Haf-dahl and family. Mr. Haf-dahl left Viking for Webster, Minn., some time ago and Mrs. Haf-dahl and family are leaving for there shortly where they will make their future home. The family will be greatly missed in this community where they have taken an active part in work of the Norwegian Lutheran Church. In behalf of the congregation Mr. S. Hafso presented the Haf-dahl family with a purse of money and told of the regret that would be felt, yet wished them the best of success in their future home. With a few well chosen words Mrs. Haf-dahl thanked the congregation for the kindness they had expressed.

Choosing twelve men to a side, the town and country horse shoe pitchers held a tournament at the fair grounds Tuesday evening. When the total score was counted up at the finish the country boys were 86 points ahead of the Main street champs.

Everything would have been fine, but Amor Long chuckled so loud that the town fellows threw a challenge in the air which was caught up immediately. Mr. H. E. Gates, who throws a mean shoe for the country team, stepped forward and invited the bunch to his place for the next tournament, when the city fellows will try and do a comeback.

Mr. and Mrs. E. Keir, of Oakland, California, motored up last week and are guests at the home of Mr. and Mrs. S. W. Jones for a few days. Mrs. Keir will be remembered as Miss Daisy Watkins, and is a sister of Mrs. Jones.

A large crowd saw Harold Lloyd in "Speedy", the picture sponsored by the ladies auxiliary of the United Church in Jensen's hall last Friday evening. It proved to be full of laughs and thrills from beginning to end. The Grattan Coulee Livestock shipping association shipped a mixed car of stock to Edmonton last Tuesday. They will be shipping again on June 25th. Anyone having stock, Phone 712.

The need of a veterinary surgeon is quite apparent in this district, and we have been asked to again call attention to the fact. Anyone knowing of a veterinary who might locate here should communicate with him at once.

Work on the second block of cement walks was started on Monday. The old board walks have been torn up from Darrah's store south to Graham's hardware.

Mrs. R. Hickson and little son arrived from Cadomin on Monday and are visiting at the home of Mrs. Hickson's mother, Mrs. M. Harris, southwest of town.

Miss Dorothy Syme, daughter of Mr. and Mrs. Peter Syme, returned this week from Camrose, where she was a recent graduate from the Normal school.

Several of our citizens attended the A. G. Barnes circus at Camrose on Saturday and at Vegreville on Monday.

Bruce Collier arrived last week from Detroit, Michigan, for a vacation. He left with his parents for Banff to enjoy a few days holiday.

Work on the loades garage and the community hall is still being held up awaiting the arrival of roof-ltimbers. The hall is being prepared for the plasterers in the meantime.

A. G. Andrews, M. L. A. is addressing a public meeting in the Elks Hall on Saturday evening of this week.

PURE BRED CHICKS

Many of the highest record Pure Bred flocks in Western Canada supply us hatching eggs. These flocks are carefully culled and selected and selected. EDMONTON EXHIBITION
JULY 15th to 20th
Since the attractions for the Edmonton Exhibition were arranged for some very interesting features have been secured as "extras" in line with the policy of the management to make the 50th Anniversary of Western Canada's first exhibition the most attractive ever staged. For the big exhibition which opens in Edmonton on Monday, July 15th, Capt. Walter's observation balloon has been secured; this will recall army days to many. In addition to carrying passengers, it will each night give a display in fireworks depicting Niagara Falls, from 1000 feet in the air.

Two loan exhibits of painting are being brought to the Edmonton Exhibition at considerable expense, and will be displayed on the top floor of the Manufacturers' Building; contrary to custom, no extra charge will be made to view these paintings, which include a number of historical works; all told there will be about 150 paintings by celebrated artists; one exhibit is from the Royal Canadian Academy of Art in Montreal, and one from the Royal Clark Stone collection in Toronto.

Excursion rates on all railways, and a free camping ground for motor tourists, will help swell the attendance.

COMMUNICATION

Dear Sir—
I beg to advise that Weed Conferences will be held on the following dates commencing at 10 A. M.
Clareholm, School of Agriculture, June 28th.
Raymond, School of Agriculture, on June 29th.
Olds school of Agriculture, July 3.
Drumheller, July 6th.
Vermilion, School of Agriculture, July 10th.

The public is cordially invited to attend any or all of these conventions. We trust that Councils and Weed Inspectors will be well represented. We would appreciate your giving publicity to these conferences and encourage people to attend.

Yours very truly,
W. J. Stephen,
Field Crops Commissioner

NOTICE

I will not be responsible for any debts incurred by my wife, as she has left my bed and board. — Sherman Prosser.

WANT ADS

STRAYED—From Section 24-44-9, with two Geldings, 1 Steele Gray coming 6 years; one Dark Bay coming 5 years. Branded 3—three bar on left thigh. Kindly notify G. S. Clapp, Irma, Alta.

FOR SALE—Good family cow, gentle easy milker.—H. W. Love, Irma, Alta.

WHY BEES SWARM

Swarming is the bee's method of making increase, but the desire to swarm is created by certain conditions within the hive which give to the colony a feeling of strength and prosperity. Swarming is the result of an overcrowded brood nest and this may occur in weak as well as in strong colonies, in fact, it is colonies of medium strength that usually give the most trouble. Congestion of the brood nest is brought about by one or more of the following factors: the use of hives that are too small to accommodate the queen, thus preventing the proper expansion of the brood nest; the use of poor combs or sheets of foundation in brood chamber, which often act as barriers to the queen and thus confining the brood nest to a small part of the brood chamber only; overheating through insufficient ventilation or lack of shade, which causes the inside of the hive to become very uncomfortable and to remedy the condition more bees stay at home to ventilate the hive, but instead of relieving the condition, it is intensified; improper supering, forcing the bees to store surplus honey in the brood chamber instead of in supers, thus reducing the area required for the rearing of young bees; unfavorable weather conditions which may retard brood rearing during the spring, so that at the commencement of the main honey flow, there may be an unbalanced condition within the hive, and the young bees may outnumber the field bees. The same condition may arise from poor queens that fail to reach maximum egg production until too late in the season, or from colonies that are too weak in the spring to give full support to a good queen.

For further information on swarming send for Bulletin No. 33 of the Bee Division, Central Experimental Farm, Ottawa.

VIKING

The Strume Dramatic Society presented their play "A Pair of Sixes" in Jensen's hall on Tuesday evening, June 11th, under the auspices of the local Ladies Altar Society, of St. Mary's Church. The presentation of this laughable farce was the equal and in many ways excelled the efforts of other amateur societies which have appeared here this spring. The music furnished by their orchestra was also of a high order. In the cast were O. McCune, A. A. Aldridge, B. Paul, Mrs. M. McMillan, C. F. Kruger, Francis Moeke, C. P. Hayes, Alfred Machtem, Mrs. J. Hamilton, Miss Helen Stiles, and Miss Mary Miller. Lunch was served at the home of Mrs. J. L. Slavik after the performance.

A sample of fall rice was brought into this office on Tuesday measuring over four feet in height, now growing on the Jas. Milne farm nine miles northwest of town. It is a good stand and shows no ill effects of the continued dry spell.

NEWS ITEMS FROM KINSELLA

A new immigrant from Norway has arrived in the person of Tarjei Skari. Mr. Skari is at present making his home with his uncle O. T. Skari.

On account of the shortage of moisture, very little new land is being broken this year so far. The crops too are in urgent need of rain. During the past few days the weather has been cool and the sky laden with clouds, so indications point towards an early change and sincerely hoped for.

An accident occurred north of town on Saturday, when a car driven by Miss Landers turned over. There were two other passengers in the car, a sister to the driver and a young missionary student. One of the girls received injuries and was rushed to the hospital at Viking. The other two luckily escaped being hurt and it was reported the following day that the girl is doing well.

Much more road work than formerly is being done throughout the district this summer. Owing to the many quarters of land being fenced by new settlers, it has been found necessary to open up several road allowances in different parts of the district that has formerly been impassable.

The tent caterpillar is again in evidence, cleaning off the leaves of trees, etc. Although not nearly as thick as last year, they are quite numerous.

A dance is scheduled to take place in Lake Vernon school on June 21st. J. F. Murray has a gang of men busy moving his house on to the second lot west of the present site. A full sized basement is now being excavated, and this will be cement lined.

Wm. McKie is seen driving a new Chevrolet car purchased last week. The Ladies Aid held a very successful sale of work on Saturday, June 15th in the newly fitted up basement of the United Church. Coffee, tea and lunches were served by the ladies during the afternoon.

What might have been a very serious accident occurred on Saturday when Helen, the eleven year old daughter of Mr. and Mrs. Fred Waltz fell off from her saddle horse while chasing some horses out to the pasture. The little girl was unable to explain just how the accident happened but must have got caught fast in the stirrup or tangled up in the halter rope, and dragged along the ground. Her face was badly scratched and several teeth damaged. She was taken to the Viking hospital by Johnny Medynsky for medical treatment, and on Sunday was reported to be doing nicely.

The Ladies Aid held a tea and had an apron sale in the basement of the Church on Saturday afternoon. They took in \$35.00.

On Saturday, June 29th the Women's Institute are holding their regular monthly meeting and also having a social afternoon for the settler's wives on the Hudson Bay land who have recently come. Also the report of the Convention will be given at that time.

Mrs. Neace who has been living at the Coast, spent a few days with her son and his wife. She left for the East last Friday evening on the Confederation. We understand she intends remaining in the East.

Mrs. McKinnon who has spent the past few months with her daughter, Mrs. M. Neace, left for her home in Edmonton on Saturday evening.

Messrs. E. C. Williams and W. McKie motored to Edmonton on Monday. Mr. W. McKie has purchased a new Chevrolet sedan the past week from E. C. Williams.

Mrs. Hawkesworth and son, Claude, of Vermilion, spent Sunday with the former's daughter Mrs. J. Neale. Miss Ellen Neale returned home with them where she will remain for sometime.

Mrs. Lund of Viking is visiting her daughter Mrs. Carl Smogard. On Sunday, June 16th following the closing of the service a very quiet wedding was held in the church when Mrs. Minnie Miller became the bride of Mr. William Korne, they were attended by Mr. and Mrs. Fleming, the bride was dressed in a rose beige silk with hat to match. After the ceremony a few of the intimate friends of the bride and groom were invited to the home of Mr. and Mrs. Garden who served the wedding supper. They will reside on the groom's farm east of town.

Mr. and Mrs. Percy Jones and family and Mrs. Mackay of Irma called on Mr. and Mrs. R. Eaton Sunday evening.

The pupils of the High School will be busy the next two weeks writing on their exams.

Mr. J. Overbo is busy these days demonstrating his May Tag washer for which he is agent.

Rain is needed badly in this district. Quite a number from here attended the sports at Irma last Wednesday afternoon.

WORLD HAPPENINGS BRIEFLY TOLD

Plutarco Calles, former president and minister of war for Mexico during the recent revolt, has retired from politics.

Veterinarians of Manitoba will hold their semi-annual meeting in Brandon, July 5, during the week of the summer exhibition.

It is estimated that 22,000,000 acres will be sown to wheat in Canada this year, or 1,000,000 acres more than a year ago.

The Dominion treasury has \$78,231,169 in gold in the central gold reserves, while according to last bank statement the banks of Canada hold in their vaults in Canada an additional \$10,000,000 in gold.

A flight by Russian aviators from Moscow to New York by way of Alaska this August is being planned by the Soviet aviation commission. The plane, called the "Land of the Soviets," will be named by four men.

Convicted to be hanged at Prince Albert, Frank Carrier, 75-year-old farmer of the Meadow Lake District, was informed that reprieve had been granted and that the sentence had been commuted to life imprisonment.

Manuel Dornas, a member of the crew of the Alaskan Steamship Company liner, "Alutian," who climbed back on the ship from a lifeboat to rescue a "lucky" horse, was the only fatality when the vessel struck a rock and plunged to the bottom of Lynk Bay, near Kodiak Island, Alaska.

The Dominion government has collected in income and business profits taxes \$742,128,192 from the tax year first imposed in 1914, up to the end of the last fiscal year. It cost \$19,226,127 to collect these taxes, or 2.6 per cent. This announcement was made from the office of Hon. W. D. Fisher, minister of national revenue.

A Dread Scourge

New Methods Needed To Make Headway Against Cancer.

Sir Arbuthnot Lane, one of the leading medical authorities of Great Britain, thinks the healing profession must shift its ground completely if it is to make any headway with the fight against cancer.

Undisputed statistics prove that the death rate from cancer constantly rises. It nearly doubled between 1911 and 1920. The British physician says, and multiplied eight times in less than a century. Therefore a complete change of method on the part of those treating this disease seems necessary.

"I believe," said Sir Arbuthnot, "that the only cure for cancer lies in prevention. It never attacks a healthy organ. Accordingly he recommends that advising the healthy body to keep well is to be the function of the physician in future. Simple enough if the doctors can do it," Detroit News.

The pessimist (proposing): "Darling, I love you. Will you be my widow?"

"Are you off on pleasure bent?"

"Worse! I'm off on pleasure broke."

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

Prominent Agriculturists To Meet

Canadian Wide Gatherings Of Seed Growers and Scientists At Winnipeg

(By E. Cora Hind)

June 8 to 15, are to be important days for agriculture and livestock in Canada for during those eight days the year-work and findings of the Plant Breeders' Association, the Canadian Seed Growers' Association, the Canadian Technical Agriculturists, and the Western Canada Society Animal Production, will all be discussed and action taken on such important subjects as the standardization of names of seeds and vegetables and flowers for registration and appraisal and determine the extent to which the Seed Growers' Association might go in encouraging the production of field root, vegetable, garden and forage crops suitable for registration. Special interest will centre on the question of the registration of alfalfa and other cross fertilizing crops.

From the cereal breeding committee will come a report which will be the basis of a discussion on the desirability of retaining generation numbers and special attention will be given to whether or not "number three registered" should be eliminated. It is expected that a resolution will be arrived at as to the "proper type of Marquis wheat required for registration."

The Canadian Seed Growers will have only two addresses from their own members. President H. G. B. Stradling, will deal with the wheat generally, and Prof. T. J. Harrison, will speak on the recent trip to Europe, and the types of barley required for the British market.

The Animal Production men are bringing two world famous men whose addresses will be heard by all the organizations. These are Dr. F. A. E. Crew, Ph.D., D.Sc., professor of animal genetics, University of Edinburgh, and Dr. W. L. Williams, Professor Emeritus of Veterinary Surgery, Cornell University. The animal production section will also have as a special speaker, Dr. Alfred Savage, B.S.A., B.V.M., Animal Pathologist at the Manitoba Agricultural College, who has been working in collaboration with Dr. Williams. The Canadian Technical Agriculturists in Cereal Research Investigation of the United States Department of Agriculture, Dr. M. J. Dorey, Chief of the Department of Agricultural Economics, Kansas Agricultural College, and Dr. J. C. Dorey, Chief of the Department of Agricultural Economics, Kansas Agricultural College, will be heard by all the organizations. These are Dr. F. A. E. Crew, Ph.D., D.Sc., professor of animal genetics, University of Edinburgh, and Dr. W. L. Williams, Professor Emeritus of Veterinary Surgery, Cornell University.

Manuel Dornas, a member of the crew of the Alaskan Steamship Company liner, "Alutian," who climbed back on the ship from a lifeboat to rescue a "lucky" horse, was the only fatality when the vessel struck a rock and plunged to the bottom of Lynk Bay, near Kodiak Island, Alaska.

The Dominion government has collected in income and business profits taxes \$742,128,192 from the tax year first imposed in 1914, up to the end of the last fiscal year. It cost \$19,226,127 to collect these taxes, or 2.6 per cent. This announcement was made from the office of Hon. W. D. Fisher, minister of national revenue.

Monday night, June 10, the Provincial Department of Agriculture will give a dinner in the H. B. Co. store, when the Minister will preside and Premier Bracken will be the speaker. Tuesday night, June 11, the Seed Growers and the Technical Agriculturists will bring the dinner guests of the T. Eaton Company, and will be further entertained by a motor drive after dinner.

Thursday, June 13, there will be an excursion by motor to the Dominion Experimental Farm, at Morden, supper there and a return to the city by moonlight. It is hoped that a number of wives will come with their husbands to these meetings, and special entertainment is being provided for them.

The Province of Manitoba and the City of Winnipeg feel deeply honored at the opportunity afforded of entertaining such important bodies, and hopes to give a profitable and very happy time during their stay.

Sunspots and Rabbits

The number of pellets received by the Hudson's Bay Company from year to year since about 1840 showed marked periodic variation. According to an investigation made at the Dominion Observatory, Ottawa, the number of rabbit pellets was, on the average, three times greater one year before the minimum of sunspots than at the maximum.

She (in car)—"Don't tell me the car is out of gas?"

He—"All right, then, the gas is out of the car."

How To Measure Height

To measure a tree, set a stick straight up in the ground. Use a plumb line to get it absolutely perpendicular. Measure the shadow it casts, and the shadow cast by the tree. As the shadow of the stick is to the length of the stick, so is the shadow of the tree to its height. Figure it out.

"Daddy, can you tell me if Noah had a wife?"

"Certainly—Joan of Arc. Don't ask silly questions."

WOMEN'S TENNIS CHAMPION

A most recent photograph of Helen Wills, women's tennis champion, taken when she was in London upon the occasion of her presentation at court. She is seen here, just leaving the American Women's club.

Canada's First Passenger Train

Left Toronto Station On May Sixteenth, 1829

Seventy-six years ago on May 16th, at 8 o'clock in the morning, the first passenger railway train to run in Canada, pulled out of the old station nearly opposite the Queen's hotel on Front street, Toronto, and made its initial trip to Aurora, Ontario. Up to that time the only form of transportation was the all horse-drawn stage coach and the carrier's wagon. The train consisted of a 21-ton engine with 5-foot driving wheels and a 14x20 cylinder, a box car and a passenger car. Alderman John Barrie was the conductor and passengers had to purchase their tickets from him on the train. The fare was \$1 each way. The journey occupied two hours. The engine drawing the train was named "Lady Elgin" after the wife of the governor-general.

Foundation Of Farming Industry

Cow Serves Mankind In More Ways Than Any Other Animal

The cow really forms the foundation of the farming industry. Not only does she supply the world with all the milk products, such as butter, cheese, milk, and cream, but almost all her flesh can be eaten, and beef is the staple meat of most countries. Her hide is used for making leather, and her hair for making with plaster. Glue is made from her hoofs, and gelatine powder from her joints. When everything else is removed her bones are ground into fertilizer in so many ways.

Will Trek To Alberta

Another of the Hutterite-Bader-Gemeinde colonies, organized near Freeman, South Dakota, by Russian immigrants about 50 years ago, will leave South Dakota when the Wolf Creek group, numbering about 150 treks to Alberta. An option on their property, comprising 5,400 acres of improved land, has been obtained by A. W. Harper, Minneapolis banker, who plans to dispose of it in tracts of 160 acres each.

How To Measure Height

To measure a tree, set a stick straight up in the ground. Use a plumb line to get it absolutely perpendicular. Measure the shadow it casts, and the shadow cast by the tree. As the shadow of the stick is to the length of the stick, so is the shadow of the tree to its height. Figure it out.

Little girl to uncle, whose voluble wife has just stopped talking to take breath: "Now, Uncle Henry, you say something."

"Daddy, can you tell me if Noah had a wife?"

"Certainly—Joan of Arc. Don't ask silly questions."

Find Germless Island

Scientist Says Land In Arctic Circle Has No Microbes

Science has its fairy tales, among the most remarkable coming to us from the geological laboratory at Leningrad, with Dr. A. F. Kazansky responsible for it. That source may discredit it in some minds, but is accorded recognition on this continent. According to this story, the northern island of Novaya Zemlya, in the Arctic circle, is absolutely germless. Tests made by Dr. Kazansky of air, earth, water and dust failed to find trace of a single microbe. Even the wild game which the guns of his party brought down was wholly free from germs.

Canning methods were devised in order to save some vagrant microbes and cultivate it. But, despite every effort known to scientists to the encouragement of germs, not a colony could be raised. This dish of agar-agar jelly was exposed outdoors for hours, then placed in an incubator and warmed. If this had been done in a big city, a fifteen-minute exposure would have been sufficient to produce a grain population beyond count. The agar-agar dish remained on Novaya Zemlya, as sterile as at the moment of its preparation.

Fresh and juicy meat was exposed in this way for eight months, and at the end of that time displayed no sign of decomposition. Seemingly it was as fresh as when placed in its open container. Doctors would find little to do in this island, unless it be caring for frozen ears and fingers. It is suggested that sanatoria established there might offer to pulmonary patients an unusual chance to win their way to health.

The extraordinary purity of the polar air had been previously observed by many explorers and scientists. But until now no one supposed that 100 per cent purity could be found anywhere on the earth's surface.

Recipes For This Week

(By Betty Barclay)

CALIFORNIA MOCK DECK
1 1/2 pounds flank steak.
1 1/2 cups soft crumbs.
1 cup chopped prunes.
1 egg.
1 teaspoon salt.
1 teaspoon pepper.
1 teaspoon lemon juice.
Small pieces of suet.
Pound steak. Brown quickly on both sides in a hot frying pan. Mix other ingredients and place in center of steak. Roll and tie. Lay pieces of suet over the top, place in a roasting pan, cover with hot water. Bake for one hour. Thicken liquid for gravy.

ORANGE AND RHUBARB SAUCE

2 pounds rhubarb.
2 oranges.
1 1/2 cups sugar.
1 tablespoon granulated gelatine.
1 tablespoon cold water.
Wash rhubarb, cut into inch pieces; peel oranges, removing membrane with peel, and cut in small pieces, put rhubarb, orange, and sugar in a casserole or glass baking dish and bake about one hour. Dissolve gelatine in cold water, add to rhubarb mixture, and when cool, fill in individual pastry shells with sauce, and decorate with whipped cream, forced through pastry bag and rose tube.

Finds Rubber Heart Works

Surgeon Thinks It Will Prove Good Substitute For Natural Organ In Experiments

A cat equipped with a rubber heart lived for several hours, Dr. O. S. Gibbs, of Dalhousie university, announced in a lecture at the Nova Scotia institute of science.

The heart, electrically operated, maintained full action in the saline circulatory system, from which the natural heart had been removed.

Experiments to study the effects of drugs on the system soon wear out the natural heart, Dr. Gibbs said. He expects the rubber organ to prove a good substitute. The operation to replace the heart in the cat took about five minutes.

On the Warpath

Daughter: "As you were so late, Dad, I told mother I'd wait up for you."

Father: "I was detained at the club, er—what's your mother like?"

Daughter: "Like an accident looking for somewhere to happen."

He: "Wouldn't you tire of seeing me at breakfast every day?"

She: "Oh, yes, but I don't get up for breakfast."

The speed at which sensations are transmitted along our nerves is about 100 feet a second.

Romantic Story Of Progress

Empire Buyers Are Empire Builders, Making Prosperity For All

Carry the mind's eye back half a century and there commences the most remarkable example of city building on this continent. It is the story of Winnipeg, which has grown from an Indian Trading Post to the Grain Centre of the world and the Metropolis of the Great West. And what is true of that pioneer city of the plains is true also of the West as a whole, of modern cities like Regina, Saskatoon, Calgary, Edmonton and many other progressive centres. The morning of the 23rd of August, 1870, marked the closing scene of the Red River Rebellion. Louis Riel, shoemaker and crazed with fear, fled a few minutes before Col. Wolcott, at the head of the 60th Rifles, entered Fort Garry. The arrival of the troops infused confidence among the people of Fort Garry, trade revived, money became plentiful.

The first cabinet of Manitoba was formed on June 12th, 1871. A census in this year showed Manitoba's population divided as follows: French half-breeds, 5,737; English half-breeds, 4,083; whites, 1,565; Indians, 588. Total 11,963.

Winnipeg's population at this time was about 215 souls. Communication was by Red River cart overland to St. Paul. No regular stage route was established. Mail came once a week there was no bank, no post office, no lawyer, no doctor, no church, no little newspaper, no policeman and about 20 buildings in Winnipeg. The only currency in existence was Hudson's Bay Company's notes.

In 1874, Winnipeg (capital of the western provinces of the Confederation) was incorporated as a city with a population of 1,500. Amid these scenes and activities, J. H. Chambers, in partnership with W. H. Paulin, hardy pioneers, imbued with spirit and faith of the Selkirk settlers, started in 1876, Western Canada's first biscuit factory—for Western Canada, the great land of promise, was at last on the road to progress.

It was in this same year (1876), that the first town directory was published, when the second Mayor of Winnipeg, William Nassau Kennedy, was in office. Two thousand and fifty buffalo robes were shipped out of Winnipeg in the year.

The opening of the Paulin Chambers' factory preceded by one year the first shipment of Manitoba wheat direct to Europe shipped to Scotland. Sixteen years later (1892), the first electric street cars appeared in Winnipeg. The site of the first Paulin Chambers' factory was on the east side of the city, just a little north of the present Union Depot, Main Street at that time was a prairie trail, but one or two stores dotting its fringe. And that is great interest. Immediately behind the Paulin Chambers' establishment (between Main Street and the Red River) there was an Indian camp, where every summer Saulteaux or Swampy Cree Indians came to trade with the Paulin family. The Paulin family, there was an Indian camp, where every summer Saulteaux or Swampy Cree Indians came to trade with the Paulin family.

The annual buffalo hunt was then at its zenith. Each spring in preparation for this great event the hunters gathered in a corner of Spencer's Creek, near the present Spencer Street. It is stated that the buffalo hunt gave employment to about 1,600 men, using 1,200 Red River carts.

In the year 1880—just a few years before the first carload of wheat was shipped over the C.P.R. from Western wheat fields—a new site for the Paulin Chambers' factory was acquired on Ross Avenue and a frame building erected.

The next 18 years saw a marvelous change in the growth of the West. The C.P.R. was opened in 1886, and from then on the prairie became a fertile plain, growing many different crops of grain. The enormous growth of the new Canadian Winnipeg expanded and grew. Population came. In 1898 the east half of the present Paulin factory was built. In 1890 the company was incorporated, now firmly standing upon its "sealings" the company introduced the manufacture of Paulin Chocolates and Confectionery; starting with 20 different lines. And so to the great boom year of 1909 when overnight Winnipeg became a full-grown city and every other town in the West experienced "growing pains."

This company, however, maintained a conservative attitude in the face of phenomenal conditions and steadily expanded through the merit of its products, and the constant maintenance of the standard of quality. For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

MILBURN'S HEART AND NERVE PILLS

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since.

Price 6c, a box at all druggists and direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

ZIG-ZAG Cigarette Papers

Finest You Can Buy
AVOID IMITATIONS

ufacture, clean, safe handling—rigid standards have been so impressed themselves upon the home-makers of the West, that today the very name "Paulin" implies the utmost obtainable in quality and purity biscuits and confections. Today the company manufactures 70 lines of biscuits and 200 lines of confectionery (including chocolate)—employs in its plant on an average 200 people; has an average yearly factory payroll of a quarter of a million dollars.

From bottom to top and in every phase of operations Paulin's is empire made. Building its share of empire trade, bringing into the homes of the people of Western Canada empire made products of the highest purity and excellence and doing its share in building prosperity in industry in its own sphere. The most important duty that can be performed by a company whose interest (and that of its patrons) is closely interrelated to each other's homes and welfare is the co-operation of their customers that they have prospered and trust that their share in building empire trade in their own rich has not gone unappreciated by their many friends.

Conditions Better In Great Britain

Great Improvements Shown In Basic Industries

"Conditions in Great Britain are materially better than they have been since the strike and there has been a great improvement in the basic industries," said P. A. Cleves, European Traffic Manager of the Canadian National Railways, who has come to Canada from London on a short business trip. "There has been a marked revival in the coal trade," he said, "and the severe weather which reigned all over Europe last winter helped the British producers to regain some of their lost markets."

Last year, Mr. Cleves said, the Canadian National Railways dealt with the largest freight traffic in Europe in their history. "The tourist movement to Canada is increasing astonishingly," he added. "The people in Europe are becoming more and more interested in the possibilities of spending a holiday in the Rocky Mountains, particularly in such places as Jasper National Park, which appeals greatly to their imagination."

First Air Wedding In Western Canada

Ceremony Took Place Recently 2,400 Feet Above Regina

For the first time in the history of Regina and Western Canada, a young couple, more than literally happy off on a voyage of matrimony when Miss Muriel Stuart James, daughter of Mr. and Mrs. J. A. James, Chaplain, and H. Leighton Robinson, Regina, were married 2,400 feet above the city. Rev. J. D. Willie performed the ceremony, the bride being attended by Miss Margaret Nicks, Jack Wright, pilot, acted as best man, and following the ceremony the happy couple went for a half-hour honeymoon flight.

The Mighty Pacific

The Atlantic ocean is said to have an area of about 24,536,000 square miles; the Pacific, 56,350,000. The Indian, 17,081,000; the Southern, 30,092,000; and the Arctic ocean, 4,781,000.

Visitor: Well, Tommy, and how do you like school?

Tommy: Not much. You see, I'm not very fond of children.

Big Man: "My time is worth \$50 an hour, but I'll give you just a minute."

Reporter: "In cash, sir?"

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brousseau Magog, Que. writes:—"For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

MILBURN'S HEART AND NERVE PILLS

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 6c, a box at all druggists and direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

BLUE RIBBON BAKING POWDER

Makes Pastry Delicious—Ensures Success

The Desert Song

—BY—
VIRGINIA MORRIS

Copyright 1929 Warner Bros. Pictures, Inc.
The Desert Song is a Warner Bros. production of this novel. It is based upon the story by Mrs. Barbara Leland, and the libretto by Oscar Hammerstein, 2nd and Frank Mader.

CHAPTER II. Continued

Old Hassi nodded. He remembered the night well, remembered the naked figure who had stepped into their camp and shouted defiantly. "Give me twenty of your young men who are not afraid to die! And if the law is wrong, we'll overturn the law!"

"I was only a boy indeed," continued the Red Shadow, "but I dreamed of saving the people of Morocco from injustice. When I returned to Fez, they forced me to resign from the army. I acted as if that blow had made me stupid, almost half-witted. I spent all my time picking wild flowers and, so they searched him and loo for the Red Shadow, never suspecting that he was the stupid, timid boy living right in their midst."

Then complications had arisen. General Fontaine died and the Red Shadow's own father, General Birabeau, was sent out from France to command the post at Fez. He had come with one purpose apparent in his mind—to wipe out the Red Shadow. How was his son, Pierre, to meet this situation? Could he betray the people he had learned to love? He could not. And yet it was no less difficult to keep his parents from suspecting that his boy was an enemy of the French.

"So I continued to play the fool," he went on, "and I succeeded in deceiving my father. Now because he thinks I am a weakling he hates me. That is bad enough, but to see Margot despise me too! Why, I came to Morocco to show Margot I was a man!"

Back among the tents there came a surry of excitement. A volley of guttural oaths filled the night as a dozen of the Red Shadow's men dragged in a prisoner caught by the sentry. He was thrown unceremoniously in front of the fire—five feet of insouciance dressed in bulging riding breeches fashioned out of enormous checks. It was hard to say which was the most ludicrous, his outlandish clothes, his mustache on his tiny face, pale with consternation.

Hassi drew his sword. "Let's kill him! He's a spy! I'm after blood!"

The stranger's squeaky voice protested. "Well, don't look at me, I'm anemic!"

The menacing face of Hassi terrorized him.

"You can't kill me, I'm an American! I'm no spy, I'm only the society correspondent for the Paris Herald. I didn't even mean to come here. Early this morning I went out horseback riding with my friend, Pierre Birabeau. Later he gave me the slip and I thought he had headed this way."

At this point the Red Shadow came forward. He spoke in the Ruff's native tongue. What he said meant that the prisoner should be released.

CHAPTER III.

Like most girls who have read story books and believed in them

WHAT WILL IT DO?

Women are saying: "Pinkham's Compound keeps me fit to do my work." "I was nervous and all run down. Now I eat better and sleep better." "It helped my thirteen year old daughter." "I took it before and after my baby was born." "I am gaining every day."

Lydia E. Pinkham's Vegetable Compound

W. N. U. 1758

here tonight, Paul," he told him. "It's just finishing a Mediterranean cruise. You and Margot might take the Bridal Suite and as Governor of the Post, I can marry you."

Margot interrupted. "As the bride, don't you think I deserve to be consulted?"

Paul laughed. "You could hardly be married in that riding habit, Margot."

Margot tossed her head. "I don't suppose you thought that we two might go riding in the desert together?"

"You see, Paul," General Birabeau told him, "I'm humoredly, Margot hoped you'd pick her up on your horse and carry her across the hot desert sands."

Perhaps Paul's sense of the romantic was partially awakened. At any rate the plan for a hasty marriage appealed to him and he begged General Birabeau to make out his passport. Then he turned to the girl.

"Margot, I'll be back for my answer in five minutes. If it's no, I'll make you say yes!"

"There, Margot, there's romance for you!" remarked the General.

As Paul crossed the inner court, Azuri sneaked up beside him. He turned on her with a furious contempt.

"Azuri, you can't follow me into this."

She rubbed her sensuous body against him. "Lovers, come with me tonight to the hills and tomorrow morning in your arms, I will whisper to you the name of the Red Shadow."

"I don't believe you. You don't know."

Azuri twined her arms about his neck and placed her warm dark cheek next to his. "Paul, I cannot give you up to this French woman."

Fontaine wrenched himself free and taking the girl by the shoulders he threw her roughly to the ground. Her dark eyes flashed jealously as she rose slowly, showing her gleaming white teeth, and sneering.

"Azuri that name means tiger claw. When she loves she loves for always and when she hates—she hates!"

And Azuri crept out toward the desert, leaving this half-muttered threat ringing in Fontaine's ears.

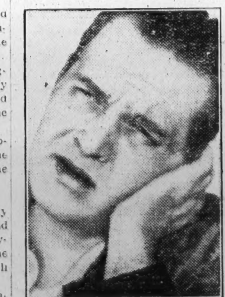

(To Be Continued.)

The Oil For the Athlete. In rubbing down the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, makes the soreness of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Canada Honey Exports. Of the total honey production in Canada last year of 22,489,969 pounds valued at \$2,785,467, 1,246,017 pounds valued at \$104,200 were exported. The Netherlands was the biggest buyer, taking 517,370 pounds and the British Isles were next with 319,818 pounds.

Keep Minards in the Medicine Chest.

Would Cut Expense. A London tailor has demonstrated a reversible coat, which can be worn inside out. Two different cuts of clothes may be worn at once, to be changed at will. Both sides are said to look like well-tailored garments.

MOST people rely on Aspirin to make short work of their headaches; but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions with which everyone should be familiar, for they can spare much needless suffering.

Aspirin is a Trademark Registered in Canada

Danish Dairy Exhibition

National Show This Year Had Largest Display Ever Held

At the Danish national dairy exhibition held in Copenhagen recently, there were exhibits of butter from no less than 1,367 dairies, and cheese from 743 dairies.

It was the largest display of its kind ever held in Denmark, and it is doubtful whether any other country could have produced such a numerous collection of samples of butter of such uniform quality despite the fact that they were made in so many hundreds of different dairies. Besides butter and cheese the exhibition also comprised condensed milk, export cream, milk powder, ice cream, dairy preparations and dairy machinery.

The quality marks given to the butter by the exhibitors showed a high degree of uniformity. From 90 to 95 per cent. of the butter exhibits were acknowledged as being fully up to the requisite standard, and the cheese exhibits were also characterized by the experts as most satisfactory.

Visitors to the exhibition came from no less than 21 foreign countries.

MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their children speak in enthusiastic terms of them. For instance, Mrs. Zephira Lavoie, Thre Rivers, Que., writes: "Baby's Own Tablets are a wonderful medicine for little ones. They never fail to regulate the baby's stomach and bowels and make him plump and well. I always keep a box of the Tablets in the house."

"Most of the ordinary ailments of childhood arise in the stomach and bowels, and can be quickly relieved by Baby's Own Tablets. These Tablets relieve constipation and indigestion; break up colds and simple fevers; expel worms; soothe teething pains and promote healthy sleep. They are guaranteed to be free from injurious drugs, and are safe even for the youngest and most delicate child. The Tablets are sold by medicine dealers or by mail at 25c per box. Dr. Williams' Medicine Co., Brockville, Ont."

Little Helps For This Week

"Godliness with contentment is great gain."—1 Timothy vi. 6.

My crown is in my heart, not on my head;

Not decked with diamonds and Indian sash;

Not to be seen; my crown is called Content.—Shakespeare.

A contented mind is always joyful; but joy-like this is but religion.

The rich and poor alike, having contentment, enjoy perpetual rest.—Buddha.

I am always contented with that which happens, for I think that what God chooses is better than what I choose.—Epictetus.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its equal has been known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

Radio Difficult To Transmit In Forest

Mysterious Barriers Exist Largely When Trees Are Sappy

When radio messages are received with comparative ease in the Arctic, and the long and short waves of electrically energized ether are received in mines deep underground, it is startling to find that difficulty is encountered in establishing radio communication in the forest. There are mysterious barriers that exist in the forest, the transmission of radio energy being affected to an unknown extent by what is called the absorption of trees. This seems to occur in spring, summer, and fall when the trees are sappy. With all the advances made by radio, it is still necessary for the protectors of our forests to use the telegraph and telephone.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Might Try It Once

Opening a family Bible, a Minneapolis man found a \$100 note seventy-five years old, and still worth its face value. Thus encouraged, I imagine a lot of people will open their family Bibles at least once every seventy-five years, just on a chance.

To Explore Baffin Land

Donald MacMillan To Head Expedition To Northern Land

Donald B. MacMillan, explorer in an address has briefly outlined plans for his projected expedition into the Arctic this summer.

The schooner Bowdoin will leave from Wauasset Harbor, June 22.

The summer will be devoted to exploration of unknown spots in Labrador and Baffin Land. He expects to return in September.

The party will work among the Nasapeo Indians, whose hostility to white men was overcome on a previous expedition, when they were assisted through a period of famine. Plans include a study of the great ice cap in Baffin Land, of which little is known. Commander MacMillan said.

A Strange Cargo

One of the strangest cargoes ever to be shipped on an aeroplane arrived at Croydon airport recently. When the large air freighter pulled up at the hangars, the load inside proved to be twelve monkeys, and a baby bear. They were shipped to a private animal dealer in London, from the East Indies, the distance from Amsterdam to Croydon being covered in the air freight.

Making Full Payment

Government Proposes To Meet All Claims Made For Reparation

Awards

The government proposes to make full payment with interest of all the reparation awards made by Commissioner James Friel, who investigated claims for compensation for losses sustained during the late war.

This was announced in the House of Commons by Hon. Fernand Rinfret, secretary of state. In making his announcement, Mr. Rinfret pointed out that while the bill before the House provided for only two and a half millions, it was proposed to put a further amount in the supplementary estimates to complete the sum required for full payment.

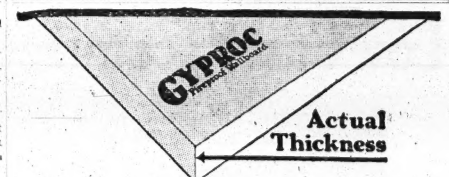

After some discussion, the bill as amended passed through the committee and was given third reading.

Love is blind. That's why a man in love is unable to distinguish between an angel and a goose.

GYPROC

Actual Thickness

Ideal--Wherever alterations are required

IN many a fine, old-fashioned farm house there are rooms much larger than people today consider necessary. This available space can be partitioned off into extra rooms with very little work and at surprisingly small cost by the use of Gyproc Fireproof Wallboard. And the Gyproc walls and ceilings of the new rooms will match the older walls—no matter how solid they are—for seasoned rigidity, good looks and permanence.

Gyproc is the perfect building material for all modern farm construction—for homes, barns, poultry houses, granaries and garages. It is pure rock—cannot warp, shrink or burn. With the use of joint filler and tape its sections meet in a tight, flush joint that insures a flat, smooth surface and takes any decoration.

Broad, ceiling-high sections of Gyproc can be nailed directly to joists and end-ways construction with a minimum of labor.

CANADA GYPSUM AND ALABASTINE, LIMITED

Head Office: Paris, Canada

Branches: Montreal, Toronto, Windsor, Winnipeg, Vancouver

GYPROC

Fireproof Wallboard

Beautiful decorative effects can be obtained by applying Alabastine, paint, paper or plastic cloth over Gyproc walls and ceilings.

Mr. and Mrs. E. L. Elford motored to Saskatoon the first of the week. Mr. Mack McMillan has been spending a few days in the city.

Mr. N. L. Fuder has returned after spending a couple of weeks in the city.

The Women's Missionary Society met at the home of Mrs. Jas. Fenton Thursday afternoon.

The Irma Ladies Aid will meet at the home of Mrs. Hill Thursday afternoon.

Born to Mr. and Mrs. Eldin Fenton, Wednesday, June 10th, a daughter, both doing nicely.

Mrs. N. M. Matheson and her brother spent the week-end in Edmonton.

Mr. and Mrs. R. Brooks returned Thursday after having a very pleasant trip to the coast.

Mr. Tomlinson and son, Miss Weaver and Mrs. P. Vollick, of Canfield, Ontario, and all relatives of Mr. W. H. King, arrived in Irma Sunday night by motor to spend part of the summer with Mr. and Mrs. King.

Mrs. Schon's mother and brother of Lacombe spent the week end with them at Irma. Mrs. Schon and children returned with them for a visit Monday.

Mr. Carl Sonoff spent Sunday with his family at Irma returning to his gang Monday. Mr. Sonoff has charge of a gang of 75 men who are changing the steel on the C. N. R. west of Irma. Mrs. Sonoff and children accompanied Carl Monday.

Mr. A. G. Walker has sold his farm northwest of Irma to Mr. A. Knudson who is taking possession the first of next week. Mr. Walker is holding a sale of his household and farming equipment on Saturday. Mr. and Mrs. Walker are thinking of making their future home in Seattle, Wash.

The weather during the past week has been very dry and windy, some of the farmers are becoming uneasy about the prospects of the crop. If they do not receive a good soaking within a short time, the early wheat will be too far gone to make a good crop. Most of the late sown grain is standing the dry weather in good shape and with plenty of rain within the next two weeks should make a good crop.

In the District Court held at Wainwright June 18th, S. C. Miles was given judgement against the Battle River Municipality for the full amount of his claim with interest. The Municipality is also to pay the costs of the action.

The members of the Standard Stock exchange and other business men from Edmonton will make an inspection of the Wainwright oil fields this Sunday.

The Alberta Wheat Pool has discontinued broadcasting for the summer months, as has been its custom in the past. The Pool will resume radio work this coming fall.

The annual meeting of the Canadian Cattle Livestock shipping association will be held at Irma Saturday, June 22nd, at 1 p.m. The meeting will be addressed by Mr. A. D. Haarstad, of Bentley, second vice president of the Central Board.

VALLEY SPRING U.F.A. No. 77

About 25 attended the meeting held at the residence of Mr. and Mrs. E. Erickson on Thursday, the 13th of June at 2:30 P.M. After the usual order of business was completed we were favored with addresses from Mr. Ford, weed supervisor and Mr. O'Neil our local weed inspector. It was decided to hold our annual picnic on Friday, July 26th at Pendleton's lake, full announcements later.

Then followed a joint meeting of the U. F. A. and U.F.W.A. when Mrs. Tweedie gave an excellent paper on Canadian Literature and Mr. Wm. Comley gave a paper "My Country," which was enjoyed by all. The U. F.W.A. were honored by a visit from Lady Rodney and Mrs. Ellis, of Edmonton, who gave short addresses on Girl Guides' Work.
